

Bio RPM Collections COVID-19 Roadmap

Jun Aruga

Roadmap: Big picture

Repeat for each nf-core pipeline

1.1. List up the dependency software of the nf-core pipelines.

2.1. Find the alternative for some non fully open sourced software

3.1. Run the pipeline without container.

1.2. Release the existing used bio tools RPM packages to EPEL 8 and 7.

2.2. Register the RPM to Fedora dist-git, and release it to Fedora and EPEL 8 and 7.

3.2. Create and run the pipeline container

3.3. Benchmark the pipeline on HPC
